FAIEZ MANSOORI

AI & Data Science Engineer | Python • SQL • Machine Learning

Bhopal, Madhya Pradesh, India

+91 9669298232 | engineerfaiezmansoori@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Python, SQL, Machine Learning, Statistics, and Data Analytics. Built and evaluated classification, regression, and clustering models using scikit-learn, with strong skills in data cleaning, exploratory data analysis (EDA), feature engineering, and data visualization. Seeking an AI/ML, Data Science, or Data Analyst internship to deliver data-driven solutions.

Technical Skills

Programming Languages: Python, SQL (MySQL)

Machine Learning: scikit-learn, Classification, Regression, Clustering (K-Means), PCA, Hyperparameter Tuning (GridSearchCV), Cross-Validation, Model Evaluation (ROC-AUC, Confusion Matrix), Feature Engineering

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Cleaning, Statistics

Tools: Jupyter Notebook, Git, GitHub

Core Concepts: Data Structures, Problem Solving, File Handling

Projects

Machine Learning Model Comparison & Evaluation – Breast Cancer Dataset *Python, scikit-learn, Pandas, Seaborn*

- Compared 6 classification algorithms using 5-fold cross-validation; Logistic Regression achieved the best performance at **98.1% CV accuracy**.
- Evaluated models beyond accuracy using ROC-AUC curves, confusion matrix, Random Forest feature importance, learning curves, and correlation heatmaps.

Clustering & Hyperparameter Tuning – Wine and Diabetes Datasets *Python, scikit-learn, Matplotlib*

- Applied PCA for dimensionality reduction and K-Means clustering (k=3) on the Wine dataset to compare unsupervised clusters with true classes.
- Tuned a Random Forest Regressor on the Diabetes dataset with GridSearchCV, identifying optimal parameters (`max_depth=5`, `n_estimators=300`).

Activa Rental Management System (Command-Line Application) *Python, File Handling*

- Developed a console-based rental system with rent and return workflows, automatic itemized billing, live stock tracking, and partial-return support.
- Implemented input validation, duplicate-rental checks, a password-protected owner panel, and bill storage using text file handling.

Data Science Journey – Practice Repository *Python, NumPy, Pandas, Jupyter*

- Maintain a public GitHub repository of daily Python, NumPy, Pandas, and data science practice notebooks to build hands-on skills.

Education

LNCT Group of Colleges, Bhopal, Madhya Pradesh **2024 – Present**
Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science

Relevant Coursework: Machine Learning, Statistics, Data Structures, Database Management Systems, Python Programming, Data Analytics

Govt. Boys Higher Secondary School Class XII – **65%**
Radhakrishna Ideal High School, Ghuwara, Chhatarpur, Madhya Pradesh Class X, MP Board – **53%**
